SYSTEMS AND COMPUTERS IN JAPAN
CONTENTS FOR 1989

NUMBER 1

Page

Seiichiro Dan, Takahira Yamaguchi, Osamu Kakusho and Yoshikazu Tezuka: Program Verification System with Synthesizer of Invariant Assertions 1

Takami Yasuda, Yasuhiro Hashimoto, Shigeki Yokoi and Jun-ichiro Toriwaki: Planning Support System for Craniofacial Surgery Using CT Images 14

Jun-ichi Hasegawa, Hiroaki Kubota and Jun-ichiro Toriwaki: IMPRESS: A System for Image Processing Procedure Construction Based on Sample—Figure Presentation . . . 22

Tsutomu Endo: PROFIER: A Prolog-Based Support System for Developing Picture Recognition Program 31

Satochi Nishikawa, Hidechika Takahashi, Masayuki Kobayashi and Tsutomu Takiguchi: A Video Tape Production System with Digital Captions in a Code Format for the Deaf . 39

Fumio Wakui, Masaichi Tanaka and Hiroyuki Sakamoto: Construction and Application of Multivalued Multithreshold Circuit Based on Threshold Control 48

Takahiro Haga and Teruo Fukumura: Multivalued Input, Two-Valued Output Logical Element as a Two-Valued Universal Logic Module 65

Shiro Handa, Hideki Inoue and Hatsukazu Tanaka: An Approximate Encoding Scheme for Line-Drawings Using the Concept of Vector Quantization 74

Yuji Iwahori, Noriharu Hiratsuk, Hiroyuki Kamei, and Shoichiro Yamaguchi: Extended Photometric Stereo for an Object with Unknown Reflectance Property 83

Masateru Harao and Kouji Iwanuma: Transformation Rules for Automated Design of Circuits by Theorem-Proving Techniques. Transformation from Recursion Equations to Circuit Descriptions 93

NUMBER 2

Seiji Kashioka and Masakazu Ejiri: Analysis and Evaluation of Sampling Methods in Binary Pattern Matching 1

Yasuro Shobatake and Hideo Aiso: A Prolog Machine Based on VLSI Algorithms 15

Toshio Okamoto: Representation of Teaching-World Knowledge and the Method of the Inference for Intelligent CAI 25

Hiromi Miyajima: A Real-Time Recognition of Languages for Bounded Cellular Automata 38

Kenji Murakami, Yasuhiro Yamajo, and Tsunehiro Aibara: Construction of Associative Memory from Incomplete Memorized Information Using Space Reduction Method 52

Page

Koichi Sano, Kazuo Suzuki, Tetsuo Yokoyama, and Hideaki Koizumi: MR image Reconstruction from Half the Data Using a Phase Map 60

Izumi Sakata: An Implementation of Multiple-Valued Logic Circuit with CMOS Multiple-Valued Output Gates 67

Hiroshi Inamura, Hideo Nakano, and Yoshiro Nakanishi: Trial-and-Error Method for Automated Test Data Generation and Its Evaluation 78

Teruhiko Ohtomo, Susumu Yasuda, Takao Ohuchi, and Ken'ichi Hara: Auditory Compensation Effects in Symmetrical Three-Vowel Sequences and a Model of Preceptual Phoneme Boundary 93

NUMBER 3

Hiroshi Taniguchi, Katsushi Inoue and Itsuo Takanami: One-Dimensional Bounded Cellular Acceptor with Rotated Inputs. A Relationship between $\wedge$- and $\vee$-Types 1

Toshimitsu Tanaka, Seiichiro Naito, Tokiichiro Takahashi and Isao Masuda: Recovery of 3D Shape Based on Generalized Symmetry 13

Motohisa Tomura, Yoshinari Kumaki, Haruyuki Minamitani and Tsutomu Horikoshi: Feature Extraction and Classification of Cell Morphology in Response to the Cell Cycle 22

Mitsuo Ishii, Yoshikazu Ito, Masanari Yamamoto, Hiroaki Harada, and Michiko Iwasaki: An Automatic Recognition System for Piping and Instrument Diagrams . 32

Akira Kawamura, Noboru Sugie and Kokichi Sugihara: Recovery of Nonrigid Curvilinear Objects Using Optical Flow 47

Takashi Nakai and Yoji Marutani: Fabrication of Three-Dimensional Objects Using Laser Lithography 58

Toshiaki Ejima: Dynamics of Stochastic Relaxation Processes 68

Weon Geun Oh and Saburo Tsuji: Image Segmentation Based on Distribution of a Measure of Centrality 78

Toru Ishida: Analyzing Parallel Executability of Production Systems 85

Nobuhiko Ikeda and Toyoshi Torioka: Self-Organization of Recognition Cell Groups in Nerve Fields 98

NUMBER 4

Yukihiro Iguchi and Masao Mukaidono: Maximum PLA Folding Using Inverters 1

Takeshi Kumagai, Takanobu Baba, and Hideki Saito: Generating Cartesian Products of Two Sets on a Shuffle-Exchange Network 11

Satoshi Fujita, Reiji Aibara, Masafumi Yamashita, and Tadashi Ae: Inter-Layer Operators of Optically Connected Three-Dimensional VLSI and Their Application to Image Processing 23

Michiko Konoe, Ken'ichi Hagihara, and Nobuki Tokura: Page-Number of Hypercubes and Cube-Connected Cycles 34

Kenzo Akazawa, Katsuo Nire, and Katsuhiko Fujii: Data Compression of Myoelectric Signal—Estimation of Force and Its Long-Term Monitoring 48

Page

Takeomi Tamesada: High-Speed Multioperand Addition and Subtraction Using a *P*-ary Representation with Necessary and Minimum Redundancy 59

Hiroshi Yamada, Fumiyasu Hirose, Junichi Niitsuma, and Tatsuya Shindo: Simulation Processor "SP" 71

Hiromitsu Yamada and Kazuhiko Yamamoto: Recognition of Echocardiogram by Dynamic Programming Matching Method 80

Kazuyuki Takata, Yosaku Watanabe, and Kiyoko Yokoyama: Quantification of the Heartbeat Rhythm Using Characteristic Equation of Autoregressive Model of *R-R* Intervals in ECG 89

Yoshifumi Sekine, Kenji Narumi, and Masatoshi Suyama: Presumption of Gating System by Sodium Activation Gating Model 98

NUMBER 5

Takahira Yamaguchi, Riichiro Mizoguchi, Naoki Taoka, Hiroshi Kodaka, Yasuo Nomura, and Osamu Kakusho: Explanation Facilities for Novice Users Based on Deep Knowledge 1

Yoshinobu Sato, Hideshi Awaya, and Shinichi Tamura: An Energy Minimization Approach to Stereopsis: Perception of Multiple Interlaced Surface 8

Yasuo Ariki, Masaaki Nagata, and Toshiyuki Sakai: Word and Monosyllable Recognition Using Lifters on Two-Dimensional Cepstrum 23

Katsuhiko Tsujino, Toru Sakurai, Yasuo Nomura, Shunsuke Chigusa, Riichiro Mizoguchi, and Osamu Kakusho: A Continuous Speech Recognition System with a Powerful Environment for the Knowledge-Base Construction: SPREX II 34

Masayuki Nakajima, Takeshi Agui, Ken Uemura, and Norimasa Noguchi: Anti-Aliasing Algorithm Using Silhouette Mask Method 50

Teruo Higashino, Mamoru Fujii, Ken'ichi Taniguchi, Tadao Kasami, and Masaaki Mori: Verification of Safeness and Mutual Exclusion Properties of Algebraically Specified Token Ring LAN Protocol 57

Mitsuo Ishi, Yoshikazu Ito, Masanari Yamamoto, Hiroaki Harada, and Masanori Kakimoto: Automatic Recognition System for Color Drawings of Printed Circuit Board 69

Noritaka Nishihara and Kenichi Morita: An Extended Syllogistic System with Conjunctive, Disjunctive and Complementary Terms, and Its Completeness Proof 80

Hiroshi Matsuo, Isao Horiba, Akira Iwata, and Nobuo Suzumura: Filtered Back Projection Method for Cone-Beam X-Ray CT 96

NUMBER 6

Toshio Shimada, Satoshi Sekiguchi and Kei Hiraki: Data Flow Language DFC: Design and Implementation 1

Zhi-Zhong Chen and Takumi Kasai: Probabilistic Automata Push-Down 11

Masahiro Hori, Riichiro Mizoguchi, Masaaki Kawachi, Kuniaki Uehara, Jun'ichi Toyoda, and Osamu Kakusho: Association-Based Parser for Speech Understanding Systems—Framework Design Based on Cognitive Exploration 21

Page

Masahiro Hori, Makoto Ohsumi, Hiroshi Ozaki, Riichiro Mizoguchi, and Osamu Kakusho: Association-Based Parser for Speech Understanding Systems—Details of Knowledge and Performance Evaluation 32

Tadao Kasami, Hiroyuki Seki and Mamoru Fujii: Membership Problem for Head Languages and Multiple Context-Free Languages 43

Takashi Sato: Numerical Computation of Large Partial Differential Equations on Memory Hierarchy 52

Tokumi Yokohira and Hideo Miyahara: Analysis of Catastrophic Phenomena in a Multiprogramming System 60

Michitaka Kameyama, Shoji Kawahito and Tatsuo Higuchi: Bidirectional Current-Mode Basic Circuits for Multivalued Signed-Digit Arithmetic and Their Evaluation . 69

Shinji Shimojo and Hideo Miyahara: Process Assignment in Distributed Systems . . 80

Yoshihiro Shima, Seiji Kashioka and Jun'ichi Higashino: A High-Speed Rotation Method for Binary Images Based on Coordinate Operation of Run Data 91

NUMBER 7

Masaki Hashizume, Hirosuke Yamamoto, Takeomi Tamesada and Toshiaki Hanibuti: Evaluation of a Retrieval System Using Content Addressable Memory 1

Toru Wakahara: On-Line Handwritten Character Recognition Using Local Affine Transformation 10

Osaaki Watanuki and Toyohisa Kaneko: Speaker-Independent Isolated Word Recognition Using *N*-Segment Label Histogram Method 20

Jun-ichi Hasegawa, Noritake Okada and Jun-ichiro Toriwaki: Intelligent Retrieval of Chest X-Ray Image Database Using Sketches 29

Tadao Kasami, Hiroyuki Seki and Mamoru Fujii: Generalized Context-Free Grammars and Multiple Context-Free Grammars 43

Yoshiharu Yuba, Hiroshi Hirai, Kiyoshi Tsutsumi and Kazuo Watari: Rotated Checker-Pattern Projection and Its Cross-Point Extraction and Tracking for 3-D Object Profilometry 53

Masakazu Sato and Hideyoshi Tominaga: Pseudo Line-Image Coding and Drawing Method Based on Fractal Theory 62

Toyohiko Hayashi, Hidemitsu Ogawa and Taizo Iijima: A Method of Extracting a Kinematically Characteristic Point from the 3-Dimensional Motion of a Rigid Body . . 72

Haruo Niimi, Hiroshi Hagiwara and Shinji Tomita: The Structure of Experts: a Parallel Processor System for 3-Dimensional Graphics 83

Jun-ichi Aoe: A Fast Digital Search Algorithm Using a Double-Array Structure . . . 92

Johji Tajima: Optimum Color Masking Matrix Determination for Digital Color Platemaking, Using Virtual Color Samples 104

NUMBER 8

Mikio Takagi, Takamichi Hiyama, Mitsuo Sone and Morio Onoe: Automatic Correcting Method of Geometric Distortion in Meteorological Satellite NOAA Image 1

Page

Norio Tayama, Isao Otawara and Weidong Sun: Design Theory of Three-Dimensional Memory System for Image Processing 15

Hidetoshi Itoh, Tatsuya Hirata and Naohiro Ishii: Machine Parts Recognition and Processing Using Fourier Descriptors 26

Takashi Watanabe and Hitoshi Suzuki: Compound Decision Theory and Adaptive Classification for Multispectral Image Data 37

Yoshihiro Shima, Seiji Kashioka, and Toshikazu Yasue: Consideration on Automatic Defect Detection Algorithms for Stamped Patterns in Electronic Parts 48

Shinji Araya, Taketoshi Momohara and Tuneo Tamati: Incremental Structuring of Knowledge Base—Incremental Construction Method of Rete Network 59

Tatsuya Mikami and Kazuo Inoue: The Basic Construction of MUSAS: Musical Arrangement System. Acquisition of 4-Part Melody in Consideration of the Chord Choice 70

Tatsuya Hirata, Hidetoshi Ito and Naohiro Ishii: Extraction and Recognition of Partial Shapes of Marine Parts on an Assembly Line 78

Kosuke Sato and Seiji Inokuchi: Liquid Crystal Range Finder—A High-Speed Range-Imaging System Using Liquid Crystal Shutter 89

Fujio Yamamoto, Yukio Umetani and Manabu Demoto: Paragram: A High-Level Programming Language for Parallel Processors 100

NUMBER 9

Toyohiko Hayashi, Hidemitsu Ogawa and Taizo Iijima: Estimation of the Reciprocating Point of a Rigid Body Moving Periodically in a Two-Dimensional Space—An Interative Method Using a Correspondence between the Forward Path and the Backward Path 1

Kazuo Toraichi, Ryoichi Mori, Masaru Kamada, Satomi Ishiuchi and Sai Yang: Improvement of Video Hardcopy Image Quality by Using Spline Interpolation 13

Tetsuya Furukawa, Yahiko Kambayashi and Yahiko Kambayashi: Class of Queries Processed by Navigation in Network Databases 25

Takashi Omori: A Parallel Processor System for the Simulation of the Neuron Network 36

Takashi Suzuoka, Noboru Tanabe, Sadao Nakamura, Sumikazu Fujita and Shigeru Oyanagi: Network Performance of the Prodigy Parallel AI Machine 44

Takeshi Shakunaga and Hiroshi Kaneko: Configuration Estimate of Trihedral Vertex from a Single View 52

Heitou Zen, Katsumi Sakurai, Tetsuya Kobayashi and Shinji Ozawa: Analysis of a Road Image as Seen from a Vehicle 69

Kazuhiko Iwasaki and Tadahiko Nishimukai: Aliasing Probabilities and Weight Distributions of Several Codes 81

Tetsuji Kobayashi: A Cryptographic Key Distribution Mechanism Using Double Encryption for Secret Communications 89

Tomoyuki Nonomura, Kazumi Yamashita and Kiyotsugu Satoh: High-Efficiency Image-Coding Method Using Vector Quantization and Block Coding 100

Page

NUMBER 10

Hideo Taguchi, Koichi Kiriyama, Eiji Tanaka and Katsuhiko Fujii: On-Line Recognition of Handwritten Signatures by Feature Extraction of Pen Movements . . . 1

Jungho Park, Nobuki Tokura, Toshimitsu Masuzawa and Ken'ichi Hagihara: An Efficient Distributed Algorithm for Constructing a Breadth-First Search Tree . . 15

Nobuhiko Koike, Toshiyuki Nakata and Nobuki Kajihara: MAN-YO:Mixed Level Parallel Logic Simulation Engine 31

Koichi Wada, Kimio Kawaguchi and Hideyuki Fujishima: Maximum Lower Bound on Embedding Areas of General Graphs 39

Tsuyoshi Kawaguchi, Yuji Taniguchi and Seiki Kyan: Scheduling Jobs on a Multiprocessor System with a Common Memory 53

Teruhiko Ohtomo, Katsunori Takahashi and Ken-ichi Hara: Learning and Discrimination of Perceptual Vowel Distribution by a Neural Net Model 64

Hiroyuki Kamei and Shoichiro Yamaguchi: A Method for Reconstructing the Shape of an Object from Two Images Taken under Point Light Source Illumination 75

Yutaka Kobayashi, Yashuhisa Niimi and Shigeru Uzuhara: Linguistic Processing in an Island-Driven Speech Understanding System 85

Shinji Umeyama: A Point Pattern Matching Algorithm 95

NUMBER 11

Yoshifumi Sekine, Atsushi Muramatsu and Masatoshi Suyama: Spatial Feature Detection Using a Pulse-Type Hardward Neuron Model 1

Takuya Yasuda, Satoshi Igarashi, Oichi Atoda and Nobuo Saito: The "Pattern Associative Memory" and Its Use in Logic Programming Language Processors 11

Chanintorn Jittawiriyanukoon, Takashi Watanabe, Hikaru Nakanishi and Yoshikazu Tezuka: Approximate Performance Evaluation of Parallel Processing Systems Using Average Concurrency 21

Hiroaki Sako, Hiromi Fujii, Kazunaga Yoshida and Masao Watari: A High-Speed DP-Matching Algorithm Based on Frame Synchronization, Beam Search and Vector Quantization 33

Jiang Yu Zheng and Saburo Tsuji: Sucessive Environment Perception Using Spatial Matching by a Mobile Robot 46

Tomohisa Suganuma, Ni Yongmao and Kaoru Kurosawa: A Polynomial Time Validation Methof for Channel Boundedness of Communication Protocols (2 Processes) 60

Seiji Yabashi, Masayasu Hata, Kanji Kubo and Taro Ishikawa: Extraction and Computational Estimation of Malignant Microcalcification on Mammography 67

Teruo Hamano, Satoshi Ishibashi and Kenji Ogura: Determining the Viewing Points for 3D Objects in a Dynamic Retrieval System 77

Fumitaka Kimura, Yasumasa Honjyo, Akira Nakayama and Yasuji Miyake: Sequential-Type Distance Transformation by Supercomputer 90

Ai-Ying Zhang and Tadao Saito: A Transmission Delay Analysis of Multilink HDLC Procedure 100

Page

NUMBER 12

Mitsuo Sone, Masao Sakauchi and Morio Onoe: A Note on Image Registration Based on Geometric Correspondence between Two Levels of Extended Pyramid Structure 1

Toshio Kondo, Yoshi Sugiyama and Takayoshi Nakashima: Two-Dimensional Array Processor AAP2 and Its Programming Language 14

Takahiro Hanyu and Tatsuo Higuchi: Design of a Multiple-Valued Associative Memory . . 23

Hidefumi Sawai, Tetuya Muroi and Masahide Yoneyama: Speaker-Independent Large Vocabulary Spoken Work Recognition by a Hierarchically Matching Method and a Method with Discriminant Functions 34

Tsuyoshi Kawaguchi, Kenji Onaga and Seiki Kyan: Finding a Feasible Schedule on a Tree-Connected Processor System 48

Kaoru Takahashi, Yoshiyuki Ohta, Norio Shiratori and Shoichi Noguchi: A Design Method of Network Operating Systems Based on the Concept of an Object 58

Tadashi Ogino, Tomoo Fukazawa and Hidehiko Tanaka: Service Base System: Its Concepts and Design 71

Ikuo Ishii, Yoshimi Kagaya, Junji Yamato and Hideo Makino: A Coding Method of Multicolored Images Using Dynamic Pattern Generator 81

Jun Kiniwa and Naoki Katoh: A 1-Version Cautious Transaction Scheduler with Dynamic Version Selection 91
